CAMILO ARIAS

Product Designer (UI/UX) & Front-End Developer

Valencia, Spain | +34 656 37 83 67 | camiloarias.frg@gmail.com | linkedin.com/in/camilo-arias189/ | kauman.me

PROFESSIONAL SUMMARY

Product/UI-UX Designer and Front-End Developer focused on responsive web products, design systems and production-ready interfaces. Experience leading design and frontend implementation for fintech, B2B payments, SaaS and internal research tools, moving from Figma wireframes/prototypes to Angular/React components, REST API integration and backend collaboration. Google UX Design Professional Certificate, with a background in IT support, full-stack development and multilingual environments.

CORE SKILLS

Product & UX Design: Product design, UX/UI design, user flows, wireframing, prototyping, usability testing, user research, accessibility, responsive design, visual hierarchy, design systems, Figma

Front-End Development: Angular 21, React, TypeScript, JavaScript, HTML5, CSS3, component architecture, responsive UI, API integration, state management

Back-End & Workflow: Node.js, REST APIs, SQL, NoSQL/MongoDB, Docker, Git, GitHub, Jira, Linux, Nginx

PROFESSIONAL EXPERIENCE

Frontend Developer / Senior Frontend & Full Stack Developer | **F1-Connecting** | Valencia, Spain / Hybrid | Feb 2026 - Present

- Hold frontend and full-stack responsibilities across active B2B payments and SaaS projects, with expanded senior frontend scope from Apr 2026.
- Design and implement production interfaces for B2B payments and SaaS platforms, combining Figma workflows with Angular 21 frontend development.
- Built the complete frontend for a B2B payments product, translating process requirements into usable flows and reusable UI components.
- Developed a SaaS platform in the lottery sector from scratch across frontend and backend, contributing to architecture, interface design and platform structure.

Full Stack Developer / Erasmus+ Intern | **JKU ITS - Johannes Kepler University Linz** | Linz, Austria | Oct 2025 - Feb 2026

- Developed internal research applications using React and Python for European project teams.
- Designed and implemented a project management system with dashboards, indicators, milestones and task tracking.
- Built REST API integrations and data structures feeding status and performance dashboards.
- Collaborated with the research team to adapt customized tools to each project context.

Network Support Technician / IT Technician | **Grupo Planeta (VIU University)** | Valencia, Spain | Dec 2024 - Aug 2025

- Provided remote technical support for online exams and university platforms, prioritizing incidents through Jira.
- Documented procedures and internal guidance to reduce recurring support issues and improve response quality.
- Supported students and academic users, strengthening technical communication and service continuity.

IT Technician Level 2 | **Minsait (Indra)** | Valencia, Spain | Jun 2023 - Nov 2024

- Resolved hardware, software and connectivity issues for internal users and project teams.
- Provided IT support for an office client in English- and French-speaking work contexts.

- Collaborated cross-functionally to prioritize incidents and maintain service quality.

Systems Technician Intern | **Nunsys Group** | Valencia, Spain | 2023

- Assisted with Linux/Apache configuration and basic system administration tasks.
- Contributed UI/CSS fixes for internal web tools.

SELECTED PROJECTS

Altura Coworking Experience - UX/UI Design & Product Design | kauman.me

- Designed a mobile-first coworking experience for young professionals in Valencia, focused on booking, atmosphere discovery and community connection.
- Created personas, information architecture, low-fidelity wireframes and a cohesive design system to support a premium but usable product experience.

ITS Time Management System - UX/UI Design & Interface Design | kauman.me

- Designed a time tracking and visualization interface for JKU ITS, focused on daily entries, work package consumption and monthly reconciliation.
- Created minimalist capture flows, inline editing, validation states and review steps to reduce reporting errors and improve clarity for managers and employees.

Fynaq - Product/UI Design & Front-End Development | fynaq.com

- Led end-to-end design and development of a digital platform for real clients in Valencia, from Figma wireframes, prototypes and design system to frontend implementation and backend integration.
- Created additional visual content and social media assets tailored for different brands.

AutoTok - UI-UX Designer & Front-End Developer | autotok.net

- Led the visual design of the landing page and analytics dashboard for a collaborative UPV student project focused on automated short-form video creation.
- Implemented frontend components and REST API integrations using Angular, Node.js and REST APIs.
- Presented the project at UPV, demonstrating API integration and product workflow design.

Portfolio Website - UX/UI Designer & Developer | kauman.me

- Designed and coded a responsive personal website from scratch to showcase UX case studies, full-stack projects and learning process.
- Implemented responsive layouts, custom animations and modular frontend components.
